CLEANROOM TABLES

Type 304 stainless steel tables are available with solid or perforated tops, brushed or electropolished finish. All perforated tops have $\frac{3}{8}$ " (19mm) perforations on 1" (25mm) centers, allowing for 40% laminar flow. Available in standard widths of 24", 30", and 36" (610, 762, and 914mm) and lengths from 36" to 96" (914 to 2438mm). Custom sizes available upon request. All cleanroom tables are alcohol-wiped and cleanroom-bagged. Standard tables are C-frame and H-frame in brushed or electropolished finish.

Prefixes for tables:
 CRT series - Brushed stainless steel top
 CRPT series - Brushed stainless perforated top
 SEP series - Electropolished solid top
 EPCRT series - Electropolished perforated top

ADJUSTABLE®

Eagle's AdjusTable® Overhead system allows you to create work surfaces enhanced with single or multiple overshelves. Each work system comes with two 33" (88mm) posts, two 63" (1600mm) posts, and your choice of the following tables bases: two C-frame; two H-frame; one C-frame and one wire shelf; or one H-frame and one wire shelf. The available sizes are 24" (610mm) for width and 36" or 48" (914 or 1219mm) in length. Work surfaces are available with solid or perforated tops, brushed or electropolished. Cantilevered shelves are offered in stainless steel or chrome finish and are sold separately. Optional keyboard and utility drawers are available.

Prefixes for tables:
 OAC or WOAC series - Brushed stainless top with chrome base
 OAS or WOAS series - Brushed stainless top with stainless base
 OAP or WOAP series - Brushed stainless top $\frac{3}{8}$ " perforations on 1" centers with stainless base
 OAEP or WOAEP series - Electropolished solid top with s/s base
 OAPEP or WOAPEP series - Electropolished perforated top with stainless base

FREESTANDING AND WALL-MOUNTED GOWNING RACKS

These racks are designed for efficient storage of garments in the cleanroom.

The freestanding racks are available in stainless steel or electropolished finish. The stainless steel construction offers a non-contaminating surface that eliminates particle shedding. The electropolished models feature electrochemically passivated surfaces, for the most demanding requirements.

The wall-mounted racks are available in chrome-plated steel or electropolished stainless steel.

Open loop, two-piece and closed loop hangers are available for use with these racks. Also offered are hanger bar kits which are used with existing shelving to create a gown rack.

GOWNING BENCHES

These heavy-duty benches include flanged stainless foot plates for convenient attachment to the floor. Available in brushed finish 304 stainless steel or electropolished finish.

Solid gowning benches feature a rolled edge, with ends turned down at 90°.

The wire gowning bench is economical while using components that offer 62% laminar flow. Ideal for less demanding environments, or during construction as the room is brought into clean.

Gowning benches with undershelves are available with a perforated or solid top. One undershelf is standard.

SHOE RACKS

Wire shelves offer the optimum of laminar flow and ventilation for the storage of cleanroom shoes. Rods and tabs run through the shelves to create storage for each pair of shoes. Optional snap-on plastic shelf markers are available for identification of each storage unit. Available in chrome and electropolished stainless steel. Foot plates are included for fastening the unit to the floor.
